FOR IMMEDIATE RELEASE

PrimeSource Building Products, Inc. Agrees to Acquire Coast to Coast Building Products, Inc.

Allows PrimeSource to Expand Presence in Southeast and Caribbean Markets

Carrollton, TX, April 14, 2008 — PrimeSource Building Products, Inc., the country's largest full-service wholesale distributor of building materials and purveyor of construction fasteners worldwide, has agreed to acquire Coast to Coast Building Products, Inc., a two-step distributor with a focus in the rebar, fastener, drywall and roofing markets. Coast to Coast is headquartered in Miami with warehouses in Pompano Beach, Orlando and Tallahassee, Florida, and Atlanta, Georgia.

"PrimeSource is very pleased to announce this acquisition as it further expands our distribution base into the southeast region and allows us to take additional advantage of Coast to Coast's established markets in the Caribbean and Central America," says Ken Fishbein, Co-Chief Executive Officer of PrimeSource. "Since 1996, Peter Daniels and Richard Marcus have grown Coast to Coast into one of the major distributors serving Florida, Georgia and Alabama, and portions of Tennessee and North and South Carolina. Their network and warehouses are the perfect complement to PrimeSource as we continue to grow our geographic presence."

Daniels will remain with PrimeSource, leading the company's southeast market. "All of our customers will greatly benefit from the expanded opportunities for products offered by PrimeSource," Daniels adds. "For our employees, this acquisition allows them to become part of a global organization with a broader offering of business opportunities and benefits."

Fishbein says customers and suppliers of both PrimeSource and Coast to Coast should expect normal business operations to continue throughout the course of the transaction. Terms of the acquisition were not disclosed.

About Coast to Coast Building Products

Headquartered in Miami, Coast to Coast Building Products, Inc. was started in 1996 by Peter Daniels and Richard Marcus. The company has its main warehouse in Pompano Beach, with additional facilities in Orlando and Tallahassee, Florida, and Atlanta. With 75 employees, the company serves customers throughout the southeast United States as well as the Caribbean and Central American markets.

About PrimeSource Building Products, Inc.

With 36 distribution centers throughout the USA and Canada and more than 1,100 employees, PrimeSource is an international distributor of building materials serving residential and industrial new-construction and remodeling markets as a value-added link in the distribution chain. Core products distributed under the nationally known Grip-Rite® and Pro-Twist® brands include: Nails, screws, and collated fasteners; tools, compressors and accessories; roofing, gypsum and insulation; rebar and concrete accessories; and fencing and wire.
